SUMMARY

Data Science student at Universitat de València and co-founder of Iceberg Datum Analytics, an AI startup delivering ML and NLP solutions for the legal and healthcare sectors. Experience deploying production systems on AWS. Seeking a September 2026 internship as ML/NLP engineer or data scientist, open to fintech, retail, industrial, healthcare or energy.

EXPERIENCE

Co-Founder — Iceberg Datum Analytics S.L.

Nov 2025 — Present

Valencia, Spain · Part-time

- Co-lead the technical development of Iceberg Health (healthcare data platform) and Iceberg Law (LLM-based document processing), alongside business development and contract negotiation under NDA.
- Designed and deployed production infrastructure on AWS with Docker and FastAPI.
- Active pilots under NDA with potential clients in both sectors.

Research Intern — IDAL, Universitat de València

Jun — Jul 2026

Valencia, Spain · Research stay

- Research stay at IDAL (Intelligent Data Analysis Laboratory), the Machine Learning research group of Universitat de València.
- Research line and final-year thesis (TFG): forecasting electricity demand and price under extreme weather events, comparing classical models (SARIMA, Prophet) with XGBoost, LSTM and the Temporal Fusion Transformer.

PROJECTS

Fraud Detection System — Personal Project

Python · XGBoost · SHAP · FastAPI

- End-to-end fraud detection pipeline on PaySim (Kaggle, ~6M mobile money transactions) with extreme class imbalance; compared sampling strategies and evaluated with precision-recall AUC.
- Model explainability with SHAP and deployment as a REST API with FastAPI on Docker. 99.76% recall on the test set.

Iceberg Law — Legal Document Processing

Python · LLMs · NLP

- Automated extraction and structuring of legal documents and invoices using Large Language Models.
- On-premise GDPR/LOPD anonymization engine for Spanish PDFs: checksum-based regex (DNI, NIE, IBAN), NER with BSC-RoBERTa and a local LLM (Qwen3 via Ollama), with SHA-256 audit log and post-redaction OCR verification.

Iberia Geo-Alert — Personal Project

Python · FastAPI · Sentinel Hub · Leaflet

- Real-time dashboard of natural events aggregating four public APIs (USGS, NASA EONET, NASA FIRMS, Sentinel Hub).
- On-demand Normalised Burn Ratio (NBR) analysis on Sentinel-2 imagery for wildfires in the Iberian Peninsula; modular FastAPI + Pydantic backend, Leaflet frontend with clustering.

CENDRA — Fire-Risk Atlas

Python · GeoPandas · MapLibre · open data

- Web atlas of fire risk for the 214,000 buildings of València, built entirely from open data (Catastro INSPIRE 3D + 10 municipal layers), motivated by the Campanar fire.
- Parametric, auditable per-building risk index cross-referenced with fire-brigade response times. Model mirrored in Python and JS with 40 tests, deployed on Cloudflare Pages.

EDUCATION

B.Sc. in Data Science — Universitat de València

2023 — 2027

- GPA 7.58/10 · Top grades with honors in Machine Learning and Probability & Simulation. Coursework: Statistics, Databases, Time Series Analysis, Deep Learning.

Higher Vocational Degree in IT — IES Abastos

2020 — 2022

- Network and Systems Administration. 4-month internship at Slimbook: hardware assembly and Bash scripting for automated hardware testing.

AWARDS

First Prize — Campus Salud Gandia Hackathon 2026

2026

- Gandia Obesogenic Panel: a predictive urban-health panel for Gandia City Council that diagnoses the obesogenic environment by neighborhood, simulates urban interventions and projects their health, economic and equity impact. FastAPI backend, React + Leaflet frontend, NetworkX street-graph routing and a RAG assistant with guardrails. Team of 4 in 30 hours.

Honorable Mention — Valencia City Data Visualization Contest

2025

- Team project on flood-prone areas in the Valencian Community, awarded by Valencia City Council and ETSE-UV in response to the DANA floods.

SKILLS

Languages & ML: Python, SQL, R, Machine Learning, NLP, Large Language Models, Time Series / Forecasting.

Cloud & Tools: AWS, Docker, FastAPI, Bash, Git, GeoPandas, NetworkX, Streamlit, Power BI.

Languages: Spanish (native), Valencian/Catalan (native), English (B2).
